

Emulsion Polymers Consulting
and Education, LLC presents

Rheology Fundamentals & Applications for Synthetic Latexes and Associated Coating Formulations*

HOOVER DAM

***Three-Day Interactive Workshop
October 11-13, 2017
New Horizons
Las Vegas, Nevada, USA***

***Faculty
Donald C. Sundberg, PhD
Raymond H. Fernando, PhD***

* Emulsion Polymers Consulting and Education (EPCEd) has a curriculum of 9 interactive workshops under the umbrella of the Science and Technology of Emulsion Polymers, or STEP[®]. This workshop is STEP⁹.

OBJECTIVES: Provide industrial scientists and engineers with an intensive, interactive workshop on the rheological characteristics of synthetic latexes as they are produced via the emulsion polymerization process. The addition of such latexes to coating formulations with pigments, fillers and rheological modifiers provides the participant an opportunity to grasp the fundamental rheological principles of these highly dispersed, fluid systems.

INTENDED AUDIENCE: This workshop is directed towards those in industry who use laboratory, pilot and/or commercial scale reactors to make latex for use in coating formulations, pressure sensitive adhesives, caulks and sealants. In equal measure it is also directed towards those who purchase latex for use in their own formulated dispersions for similar applications.

STRUCTURE OF THE WORKSHOP: This 3-day workshop will be conducted in a ***highly interactive manner*** with participants being engaged in discussions, demonstrations, problem solving and case studies.

WORKSHOP OUTLINE: See next page for complete, daily schedule of topics. Faculty profiles follow on page 3.

REGISTRATION INFORMATION

The registration fee includes the full book of slides for the workshop, coffee breaks, and Tuesday evening dinner. It does not include lunches, lodging or travel. Early registration is recommended due to the workshop size limitation of 24 participants.

Registration Fee: \$1700 USD

HOTELS, TRAVEL, LOCAL ATTRACTIONS

Facility information, including directions and a partial listing of hotels in the area, is included at the end of this announcement.

**Rheology Fundamentals & Applications
for Synthetic Latices and Associated
Coating Formulations**

Day 1

AM:

- Basics of creating and characterizing synthetic polymer latices
 1. Particle nucleation and growth
 2. Control of polymer composition, MW, gel content
 3. Functional additives (esp. vinyl acids) and neutralization
 4. Colloidal stability
 5. Measurement of particle size, glass transitions, MFFT, acid distribution
- Basics of fluid rheology, including polymer solutions
 1. Newtonian, shear-thinning, shear-thickening fluids
 2. Thixotropy, rheopexy
 3. Viscoelasticity
 4. Shear versus extensional deformation

PM:

- Rheology of simple dispersions (volume fraction, particle size, temperature)
- Non-Newtonian behavior, structure development at high volume fraction
- Rheology of bimodal and multimodal dispersions
- Introduction of non-spherical particles

Day 2

AM:

- Latex particle-particle interactions, DLVO approach, water soluble materials inherent in latex polymerization
- Surface region of latex particles, hairy layers, effective size
- Role of “functional additives” (e.g. vinyl acids), neutralization, polyelectrolytes, water swelling of latex particles
- Formulated systems
 1. Binders, pigments and fillers
 2. PVC, CPVC, NVV
 3. Coating life—cycle

Day 2

PM:

- Coating ingredient effects on rheology
 1. Simple thickeners, rheology modifiers
 2. Associative thickeners
 3. Dispersants and others additives
 4. Interaction with latex surfactants
- Mixing and storage of formulated latex products
 1. Mechanical effects
 2. Heat-thaw effects
 3. Phase separation (syneresis), entropic flocculation

Day 3

AM:

- Interactions between latex particles, pigments, fillers, and other additives
 1. Effects on coating formulation properties
 2. Effects on dry film physical properties
- Applying latex based dispersions
 1. Substrates effects
 2. Shear rates relevant to various application methods
 3. Extensional viscosity and normal stresses
- Flow and leveling after application

PM:

- Film formation mechanisms
 1. Latex packing and particle coalescence
 2. Single and multiple phase particles
 3. Coalescing aids
 4. Low and “zero” VOC formulations
- Discussion of topics/questions provided by participants
- Course summary and review

Faculty Profiles

Professor Donald C. Sundberg has been working in the field of emulsion polymers for 50 years. He received a bachelor's degree in chemical engineering from Worcester Polytechnic Institute (Massachusetts) and his Ph.D. from the University of Delaware. He worked on latex based impact modifiers for ABS resins with the Monsanto Company, scaling processes to the 10,000 gallon reactor size. He has extensive research experience in emulsion polymerization and is widely recognized for his work on structured latex particles. This has resulted in nearly 100 peer reviewed publications and many conference papers. In addition he has conducted many workshops, most notably the one on latex particle morphology control, now in its 22nd annual offering. He spent a sabbatical year at the Institute for Surface Chemistry in Stockholm and was Chair of the 1997 Gordon Research Conference on Polymer Colloids. He is the 2016 Mattiello Memorial Lecture awardee from the American Coatings Association. His research interests are in polymerization kinetics in solution, bulk and emulsion systems, interfacial science and polymer morphology control, diffusion in polymers, and coatings. He is an Emeritus Professor of Materials Science at the University of New Hampshire and is the founder of Emulsion Polymers Consulting and Education, LLC.

Professor Raymond H. Fernando has been the Arthur C. Edwards Endowed Chair and Director of Polymers and Coatings Program within the Department of Chemistry and Biochemistry at California Polytechnic State University since 2002. He received his Ph.D. in 1986 from North Dakota State University in Polymers and Coatings, emphasizing studies in the coating rheology field. He has fifteen years of industrial experience in coatings, with extensive knowledge in waterborne technology. He was a Lead Research Scientist in R&D at Air Products and Chemicals, involved with the rheology of a wide range of coatings and adhesives, coatings for electronics, and nanocomposites, and was a Program Manager for Armstrong World Industries, running the coating research program that supports global manufacturing and marketing needs of Armstrong Building Products Division. His current research at Cal Poly includes understanding nanoparticle reinforcements of coatings, impact of coating raw materials on rheology, and low VOC coatings. Dr. Fernando has many publications and patents, and has given numerous lectures and presentations related to coatings science and technology. He received the Federation of Societies for Coatings Technology President's Award in 2005.

Registration Form

Rheology Fundamentals and Applications for Synthetic Latices and Associated Coating Formulations

Las Vegas, Nevada, 89128 USA

October 11-13, 2017

Name_____

Address_____

City/State_____

Postal Code_____

Country_____

Position or Title_____

Organization_____

Phone_____

Fax_____

E-mail_____

Participant Category

☐ Standard price for industrial participant: \$1700 (USD)

☐ Discounted price for additional participant(s) from the same company: \$1600 (USD)

☐ Academic participant: \$1350 (USD)

There is a non-refundable fee of \$50 (USD). Cancellation of registration can be made up until September 11, 2017 with a full refund less the \$50 processing fee.

Method of Payment:

☐ Credit Card

___ Visa ___ MasterCard ___ American Express

Card #_____

Security Code # (last 3 digits on back of card)_____

AMEX Security Code # (4 digits on front of card)_____

Expiration date_____

Signature_____

Credit Card billing address (if different than above):

☐ Wire transfer from bank --- Go to info@epced.com and request banking instructions.

For a secure eCommerce transaction, call 1-603-752-3370 or FAX this completed form to EPCEd at 1-603-343-4015. Registration forms sent as an email attachment are also accepted.

This registration form may serve as an invoice for those who register.

Facility Address

New Horizons - Las Vegas, NV
7674 W. Lake Mead Blvd., Suite 250
Las Vegas, NV 89128-6650

Contact Information

702-214-3910
Fax: 702-214-3911

**Directions****From the Airport:**

- Take ramp Paradise Rd to I-215 / I-15
- Take Las Vegas exit to I-215W
- Take exit # 12A / Las Vegas onto I-15N
- Exit # 42A / Reno / Martin L King Blvd. onto US 95N
- Exit # 82B / Rainbow N / Lake Mead Blvd.
- Right fork onto W Lake Mead Blvd.
- Arrive SummerGate Center (on right-hand side) keep going forward to see New Horizons building

Approximately 30 minutes from the airport

Hotel Accommodations - Reservations should be made directly with the hotels.

JW Marriot Resort / Rampart Casino

221 N. Rampart Blvd.
Las Vegas, NV 89145
